Personal

Since joining Core in 2004 right out of residency, I have enjoyed my years of caring for the weekend warrior to the superstar athletes and everything in-between. My goal has always been to return injured persons to what they love whether it be hiking, walking, running, surfing, snowboarding, skateboarding, motocross, MMA, basketball, football etc. A humble approach and always keeping up on the latest clinical and surgical advancements has enabled me to do so. I enjoy providing complete foot and ankle care from chronic ailments to traumatic injury. After over 10 years of practice with my wonderful colleagues at CORE I have decided to open my own practice.
